LaineKraft Cabinetry Care & Cleaning

Thank you for choosing our high-quality cabinets. To keep your painted cabinets looking beautiful and to ensure their longevity, please follow these care and maintenance guidelines.

1. **Recommended cleaning practices**
    - Regularly dust your cabinets using a soft, dry microfiber cloth to remove dust and dirt. This prevents grime buildup.

    - For a more thorough cleaning, use a mild, soapy solution. Mix a few drops of gentle dish soap with warm water. Dampen a soft cloth with the solution and wipe the cabinet surfaces, then follow up by wiping with a clean, damp cloth to remove any soap residue. Dry immediately with a soft, dry cloth. **Note**: do not use a dishcloth to wipe your cabinets as it may contain remnants of grease and/or detergents.

2. **What to Avoid when cleaning**
    - **Avoid Over-Cleaning:** While cleaning is essential, too frequent use of cleaning products can wear down the protective finish of your cabinets. Use a soapy solution only as needed and avoid overly aggressive scrubbing.

    - **Avoid Abrasive Materials:** Refrain from using steel wool, scouring pads, or harsh scrubbers that can scratch the cabinet surface.

    - **Avoid Cleaners with Alkaline or Silicone:** Many all-purpose cleaners contain alkaline or silicone that can harm your cabinets finish over time. Alkaline may dull or damage the paint, while silicone can leave behind a residue that builds up and is difficult to remove. Always check the ingredients before using any cleaning product, and opt for mild, non-abrasive cleaners designed for painted surfaces.

3. **Protection Against Moisture**
    - Prolonged exposure to water or moisture can cause warping, peeling, or damage to your cabinets. Be cautious near sink cabinets or when cleaning up spills. Immediately towel off or dry any areas that get wet. Never place wet objects, such as dishcloths on cabinet doors or in drawers. Placing items directly on the cabinet surface can cause swelling, discoloration, or warping.

    - In areas like kitchens and bathrooms, ensure proper ventilation to minimize moisture buildup. After showering, run an exhaust fan or open a window to reduce humidity.

By following these care instructions, your cabinets will remain beautiful and functional for many years to come!
